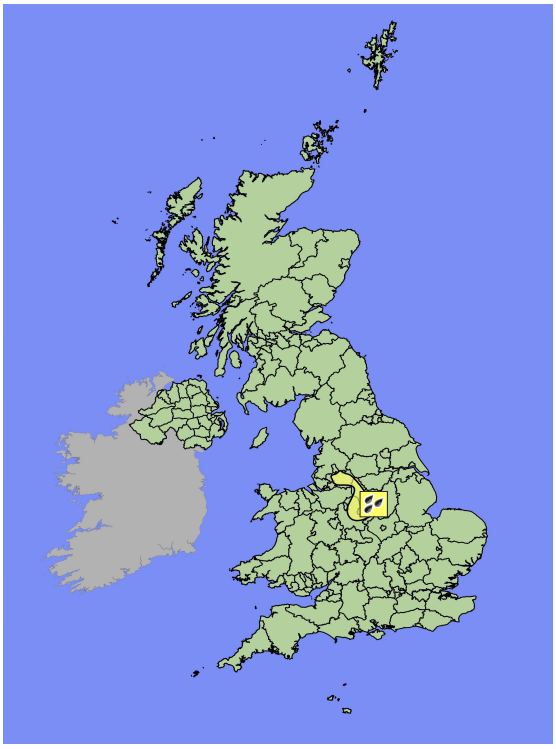
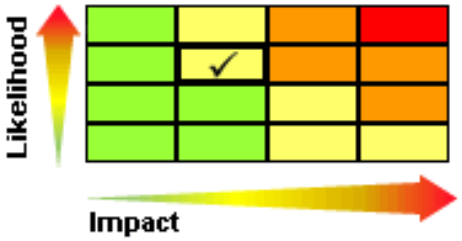
National Severe Weather Warning Service





CANCELLED

Chief Forecasters Assessment
A cold front is expected to bring a spell of wet weather later on Wednesday. River levels in the indicated part of England look most vulnerable to the expected rainfall amounts - even though overall rainfall totals further north may be higher.

Accumulations of 15 to 30 mm are expected across the area covered by the Alert, resulting in some river flooding of low lying land.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **12:00 on Wed, 25th Jan 2012** until **23:59 on Wed, 25th Jan 2012**

Rain will become heavy and prolonged again later on Wednesday.

The public should be aware that, with the ground already saturated, this rainfall may lead to localised flooding and minor disruption.
